

Kern Card Vault

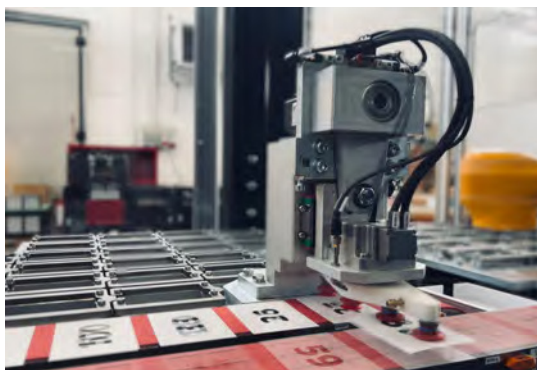

Automated Card Picking Solution

Overview

The **Kern Card Vault** revolutionizes card management by automating the card picking process. With cutting-edge robotics and state-of-the-art card reading technology, the **Card Vault** is the most advanced solution available today.

It delivers unmatched speed, precision, and scalability, saving time, reducing labor costs, and eliminating human error.

Key Benefits

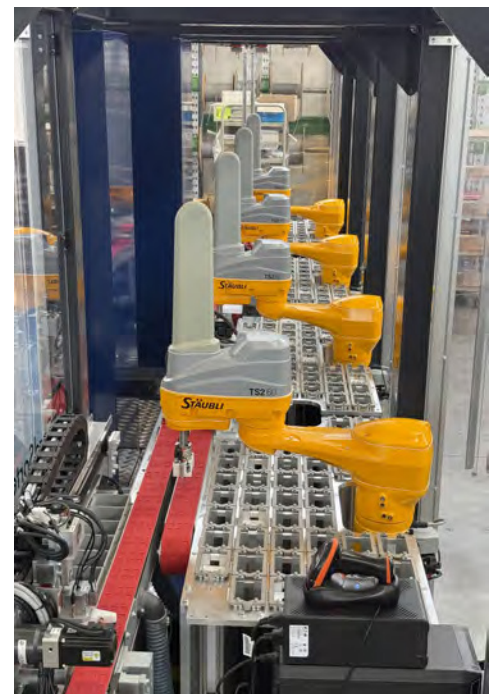

- **Save Time:** Cycle speeds up to 10,000 cards per hour
- **Reduce Labor Costs:** Minimize manual handling with full automation
- **Eliminate Errors:** Advanced card recognition ensures 100% accuracy
- **Scalable:** Tailored configurations to meet your exact workflow and volume needs

Our Services:

- On-site consulting
- Requirements analysis
- Solution design
- System integration
- Employee training
- Ongoing operational support

Ideal For

- Any size card personalization centers
- Financial institutions & payment card fulfillment
- Government agencies for secure ID production
- Loyalty & membership card programs
- Gift card production and distribution
- Any operation requiring high-speed, high-accuracy card picking

Features at a Glance

Scalable Architecture

System configured specifically for each environment

High-Speed Output

Cycles up to 10,000 cards per hour

Output Sleeves

Configured to application; each holds 500 CR80 cards

Storage Sleeves

Configured to application; each holds 500 CR80 cards

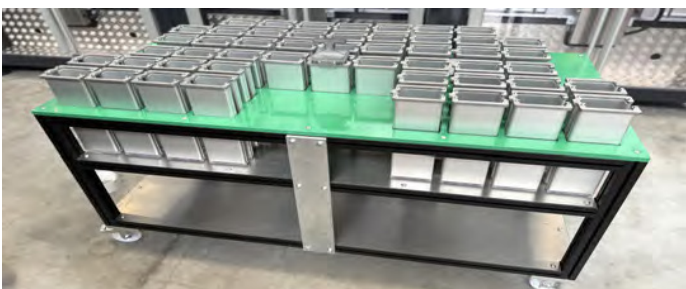

Card Reader Capabilities

Barcode, Datamatrix, OCR, Graphics, and Chip

Speed Loaders

Available for efficient and rapid sleeve loading

Preloading Tables

Optional tables for preparing upcoming jobs for seamless operation

Smart Interface

Touchscreen and tablet for simple, user-friendly operation

Why Choose the Kern Card Vault?

With Kern's reputation for engineering excellence, the **Card Vault** delivers reliability, performance, and customization, future-proofing your card operations.
